Fast concussion symptom identification and assessment

MEDIsoTECH
Your health is our business

CBS Concussion PRO – Benefits

- Rapid identification of symptoms of concussive injury.
- Provides state of the art comparative analysis to assist in fast and accurate concussion assessments.
- Identifies concussion symptoms in response follow-up, allowing advanced comparative analysis.
- A unique user identifier enables tracking and trend monitoring to track successive concussive damage.
- Can be used for sport, recreation, or general day-to-day suspected concussion incidents.
- Provides maximum user safety and welfare.
- Generates a permanent and accurate record that can be sent immediately to a third party, to assist in an accurate diagnosis and treatment plan.
- Individual patient data is securely stored and compared against previous assessments
- Information provided by CBS Concussion PRO can assist with all return to activity decision making.
- Affordable monthly subscription that can be cancelled at any time.

CBS Concussion PRO - How it Works

The Composite Balance Score

- CBS Concussion Pro consists of two carefully developed, non-invasive, observational tests.
- The Initial Assessment answers accumulate a score using best practice concussion assessment indicators.
- The process is completely objective.
- The score determines the test outcome, which can be compared against past tests as well as other relative data captured within the system.

Initial Assessment

The Initial Assessment is designed to:

- Identify any red flags
- Identify observable signs of concussion
- Create a permanent record of a possible concussive event
- Provide an immediate first aid assessment (note this is not a medical diagnosis).

Follow-up Assessment

Once the initial assessment is complete, if directed, the person is then required to perform the Follow-Up Assessment which will provide further information:

- Symptom evaluation
- Level of Consciousness
- Visual Problems
- Users medical background
- Required concussion management, including return to activity guidance
